BUILT TO LAST.

ROLLOUT BUCKETS for Skid Steers

OVERVIEW

Maxx High Dump Roll Out Buckets are the solution to high dump clearance requirements, and are backed by the best service in the industry.

Especially popular for loading feed trucks at dairies, loading debris into tub grinders and working around landfill/transfer station applications, these high dump rollout buckets are made for small wheel loaders/skid steers.

These buckets can be specially engineered to handle a variety of materials, making it the ideal tool for applications where material type, density and abrasiveness may vary, such as landfills and recycling centers.

Maxx High Dump Roll Out Buckets incorporate a single, vertically-mounted dump cylinder, which significantly improves the ratio of cylinder stroke to dump motion.

**PERFORMANCE
UNMATCHED.**

FEATURES

- Center mounted cylinder provides greater durability and strength for the long haul. Time tested and proven to last up to 30,000 hours.
- Slide links provide additional cylinder protection preventing over extension.
- Relief valve standard.
- Made to fit specific coupler system or direct mount pin on.
- Replaceable bolt on cutting edges.

Standard Model Specifications

Cylinder Bore	2.5"
Cylinder Rod Diameter (in.)	1.25"
Cylinder Stroke (in.)	12"
Moldboard Thickness	1/8"
Bolt-on Cutting Edge	OEM or Maxx
Wear Pads	AR400

Model #	Description	Weight (lbs)
4469D1	Bucket - Roll-Out - 0.75 cyd capacity - Skid Steer	925
7161D1	Bucket - Roll-Out - 1.00 cyd capacity - Skid Steer	1,100
2510D1	Bucket - Roll-Out - 1.25 cyd capacity - Skid Steer	1,275
